Rundle Disposes Ten Thousand Men Along a Twenty-mile Front.

[A. P. NIGHT REPORT.]
LONDON, May 12, 4:20 a.m.—[By
tilantic Cable.] A British column,
000 strong, has arrived at Vryburg, 100
niles from Mafeking. It reached there
fluraday and, though harassed by the
loser, is pushing swiftly forced. Thursday and, though harassed by the society, is pushing swiftly forward. Fifty miles south of Vryburg, at Taungs, is Gep. Hunter's main body, moving slowly and contending with considerable forces. The pick of his mounted men are the 2000 who are going with the wheeled transports, and at a rate that may possibly bring them to Mafeking Monday or Tuesday night.

Lord Roberts's narrative closes with Thursday evening, but he continued his march yesterday toward Kroonstadt, twenty miles distant, and by this time he must know whether the Boers intend to fight there.

Winston Churchill says that there were only 2000 Boers who opposed the British at Zand River. Another estimate is that 5000 Boers who opposed the British at Zand River. Another estimate is that 5000 Boers with six guns made a rear-guard action, while many of their thousands with convoys retired without firing a shot.

[A. P. NIGHT REPORT.]

BIRMINGHAM, May 11.—[By Atlantic Cable.] Joseph Chamberlain, Secretary of State for the Colonies, presided this evening at the annual meeting of the Grand Committee of the Liberal Unionists of Birmingham. Turning to the question of the condition of affairs in the South African settlement and the fate of the republic, Chamberlain said:

"It is premature to discuss details. While the government does not wish to be vindictive, it is determined that never again shall the republics be a nursery of conspiracy, and it will see that justice is done to those who are determined to be loyal. The government is not prepared to recognize the independence of the Boer republics cheers, and we are determined that the republics shall be finally incorporated under the British flag. For an interval they must be a crown colony, such as India is; but we hope they will eventually become a great self-governing colony, like Canada and Australia."

REPORTS FROM THE BOERS.

[A. P. NIGHT REPORT.]

LONDON, May 12.—[By Atlantic Cable.] The Lorenso Marques correspondent of the Daily Mail, in a dispatch dated Friday, May 11, says:

"The Boer papers report severe fighting on the western border. The facts are very much confused, probably by design to conceal the truth from the burghers, but there is enough to show that the Boers admit a British occupation of Taungs."

A special dispatch from Christiania, Transwal, published in the Standard and Digger News, says: "Six hundred British cavalry crossed the Vaal Friday at Kalmorg, about eighteen miles below Fourteen Streams, and wont to Taungs, followed by commandos. A second detachment of the British crossed at the same place Saturday. The Griqualanders under Gen. Aswogon after being reinforced repulsed the British, and forced them back in the direction of Taungs.
"Gen. Aswogon was killed. The other British casualties were seven younded. The Boer less was heavy. Everything was brought away from the inagure except a few tents left to attract the emeny's shells. Taungs is occupied by about three thousand British."

BOERS ARE PUZZLED,

Gen. Rundle and Gen. Brabant, are reported to have advanced toward Colocan and Platsburg.

A large commando of Boers has returned from the Korannaberg hills, and is in readiness to meet the British, but the Boers are pursiled to know by which route the British will appear.

MANY FLYING DUTCHMEN

Whole Boer Line Routed at Reit Spruit.

LOWDON, May 11.—[By Atlantic Cable.] All dispatches from Reit Spruit dated May 10 describe more fully yesterday's successful operations, saying Gen. Hamilton's scouts had on the two previous days ascertained the Boers' position and strength. On Wednesday night the Chesshire Regiment crossed the river, intrenched themselves, and prepared to hold the passage for the regiments following. At daybreak Thursday the main body crossed at two or three points. The mounted infantry was then in action, driving off the ad-

Tucker and Hamilton had a harder task on the left. The Boers had six guns, and served them well, working with great determination, but the British worked up closer and closer, ther guns meanwhile firing incessantly.

The East Lancashire and Sussex regiments by 11 o'clock had worked well to the front. The order was given, and like a flash the two regiments sprang forward simultaneously, and in a few moments had secured two commanding ridges. The advanced line was now within 1200 yards of the Boers' main trench, and the latter were already losing heart from the demonstration on their flank, but they kept up a rapid though wild fire.

At this moment the final charge was ordered, and away went the Lancashire and Sussex regiments again, but the Boers could not stand, and they fairly boited, ind the rout of the Boers along the whole line was then complete.

"We have had a successful day, and "We have had a successful day, and have driven the enemy from point to point. French, with Porter's and Dickson's brigades of cavalry, and Hutton's mounted infantry, crossed the Zand at Vermenten's Kraal, and then worked round in a northeasterly direction to Maatscahppy, being opposed continuously by the enemy. Pole-Carew's division and Gordon's cavalry brigade augmented by Battery J of the Royal Horse Artiller and by Henry's and Ross's mounted infantry, crossed the river by a drift near the railway bridge. My quarters accompanied this force. With the infantry portion we are eight miles north of the river. The drifts are extremely difficult and much cavalry has yet to come up. We shall, however, march at daybreak and push on as far as possible in Kroenstadt direction.

Danish West Indies and Brazil Affected Points-Two Pensions.

(BY DIRECT WIRE TO THE TIMES.)

WASHINGTON, May II.—[Exclusive Dispatch.] Judging by the statement made by Senator Lodge in the Senate today, Secretary of War Root was correct when he said, in his recent New York speech, that this country will either have to abandon the Monroe doctrine before many years, or fight for it. Senator Lodge sounded precisely this warning, but in a more impressive manner.

The Senate had under consideration at the time the Naval Appropriation Bill, and there were Senators present who showed a disposition to find fault with the size of the appropriations made by the hill. Senator Lodge, therefore, felt it incumbent upon himself to tell the Senate what danger lurks in the air if the United States persitently neglects the development of her navy. He told the Senate that the country is threatened in two ways at the present time. Presumably, Germany was intended in both instances, though, of course, Mr. Lodge did not mention any nation by name. He mid, however, that the United States will permit no nation to acquire control of the Danish West Indies, and intimated further that Germany at the present time has her eye upon Brasil as a fertile ground in which to extend her influence.

All this astonished the Senate very much. It must be remembered that Senator Lodge is no jingo wind-jam-

ARMORPLATE AND PENSIONS.

[A. P. NIGHT REPORT.]

WASHINGTON, May 11.—No disposition has been made as yet of the Naval Appropriation Bill by the Senate, but after an all-day discussion an agreement was reached to vote on the armor-plate section at 3 o'clock tomorrow afternoon.

During today's discussion a notable speech was delivered by Mr. Lodge of Massachusets upon the necessity of building up the United States navy without delay.

Mr. Daniel of Virginia presented an extended argument in support of the immediate construction by the government of an armor factory, while Mr. Allison of lowa opposed the project of a government armor factory on the score of economy.

The House today broke all records, passing 180 private pension bills, and adjourned over until Monday. Among the bills passed was one giving the widow of the late Gen. Guy V. Henry \$50 a month.

Hundreds of pickers had to be laid off all day yesterday, and the continuation of the damp condition today indicated that picking cannot be resumed thail tomorrow, and not then unless the weather clears and the trees and fruit dry off. The result will be heavy losses caused by the splitting of the fruit, while the shipping qualities of the remaining ripe fruit will be much imparied. "Mamma, the man is lame," I heard him whisper. 'I don't care if he is. You have paid for your seat and have a right to it, she answered pettishly. The little fellow blushed at his mother's remark.

"Now, that woman will probably read the riot act to the next man who refrains from giving her a seat in a crowded car, but what can she expect, when she teaches her own son to be discourteous to the lame and the hait?"

NEW YORK, May 11.—The Herald publishes the following statement, made by Senator Hanna last night: The selection of a man for the second place is open, has always been open and will so continue until the conven-tion shall have made its choice.
"There has been much discussion of

different men for the place, which i ery interesting and proper, but when t is said that any particular man has

said about him has been purely specu-lative from sources unacquainted with the facts.

The assertions made here and there that the President is concerning him-self with the choice of his associate on the ticket do much injustice. He has invariably declined to take any part, notwithstanding overtures from differ-ent sources by his own friends and friends of the gentlemen put forward. It would be manifestly inappropriate for him to take part in such move-ments.

"It can be said with emphasis that the Vice-Presidential nomination will remain open until the assembling of the convention, and then will be determined as the best interests of the party and all concerned shall require.

"A number of names have been brought forward, and no doubt each gentleman will develop strength. There may be some ballots before the selection can be made, but you can rest assured the man put upon the ticket will be the man the majority of the convention wish to have there. This will be fair to all.

"I have yet to hear from any source within the lines of the Republican party even a ripple of hesitation regarding the renomination of President McKinley.

"The past four years have given

garding the renomination of President McKinley.

"The past four years have given rise to new issues. There will be bold declarations on these. Four years ago, we were practically a heriniz maintenion, isolated from all the world forces which promote industry, trade and commerce. Our manufacturing capabilities and facilities were far beyond our own needs. The home demand was enormous, but to manufacture simply for home demand does not add to the general wealth. Foreign demand is what adds to our stock of wealth estimated in coin.

"The war with Spain, through wise councils in the executive officers and the warlike spirit of the army and navy and people, was brought to such a prompt and satisfactory conclusion that it not only opened the eyes of the world to our invincible fighting capacity, but to our marvelous advance in manufactures. It extended our text-

world to our invincible fighting capacity, but to our marvelous advance in manufactures. It extended our territories, broadened our productive capacity and extended our domestic markets among people whose trade had been a bone of contention among European nations for centuries.

"The Republican convention in its platform declarations will have to meet all these new problems or public policy by taking advanced ground."

From the preamble it appears that the United States Court in California has recently held that taptoca flour, cassva starch and menioca starch, all of which are made from the casava root, are not subject to duty under the Dingley law; that there have lately been erected in Florida factories for the manufacture of this kind of starch and plantations started for the production and culture of casava root, representing large investments of capital, and that these enterprises, which were started under protection, must be abandoned if it is withdrawn. But judgment has gone by default against England has gone by default against England in all civilized countries because of her action in South Africa. In our own country and in my own party I believe there is a latent fire that will require but a small amount of fanning to cause it to break into a vast and powerful flame that will inspire the people who love justice, freedom and all that tends to a high civilization and right.

Rev. Father Ducey, who preceded Mr. Lauterbach, said: "This country cannot afford to go to war over this question. We can talk now and arbitrate later. What the Boers want is sympathy and arbitration."

A committee was appointed to go down the bay to meet the envoys. The committee will conduct them to the City Hall and introduce them to the Mayor.

# POPULISTS ELECT OFFICERS

# New National Committee's First Meeting.

## Senator Marion Butler is Re-elected Chairman.

SIOUX FALLS (S. D.,) May 11.-The first meeting of the new National Com-mittee was held here today to elect officers. The meeting was a protracted one, resulting in a lively contest over the chairmanship between the friends of the former chairman, Senator Ma-rion Butter of North Carolina, and George F. Edmiston, chairman of the Nebraska State Committee. The contest also extended to the other national officers, with the exception of treas-urer, for which position George F. Washburn of Massachusetts is apparently the choice of the most of the

committeemer.
Partisans of Mr. Edmiston urged his election on the ground that as a strong friend and townsman of Wil-liam J. Bryan and in view of the coali-

liam J. Bryan and in view of the coalition between the Populist and Democratic party on the national ticket, his election would tend to make existing ties firmer and result in greater harmony in working for the goal both parties were striving for—the election of Bryan.

After an animated discussion, in which every phase of the coming campaign was gone over, Senator Butler was reelected chairman by a majority of 7 in a total vote of 76. Chairman Butler will make his headquarters in Washington during the campaign. Senator Butler accepted the position again on condition that a vice-chairman be chosen to assist in the work.

## THE NEW OFFICERS. [A. P. NIGHT REPORT.]

SIOUX FALLS, May 11.—The of-ficers elected for the ensuing term are as follows: Chairman, Senator Marion Butler. North Carolina: vice-chairman, G. F. Edmiston, Nebraska; treasurer, W. D. Washburn, Massa-chusetts; secretary, J. A. Edgetton,

Colorado.
The new Executive Committee is as follows: Gen. J. B. Weaver, Iowa; Senator William V. Allen, Nebraska; R. W. Breidenihal, Kansas; Eugene Smith, Illinois; T. V. Way, Arizona; T. Tracy, Texas; Robert Schilling, Wisconsin; Maj. Bowler, Minnesota; Dr. C. T. Taylor, Pennsylvania.

# TOWNE IS GRATIFIED.

AT ACTION OF THE POPULISTS.

[A. P. DAY REPORT.]

DULUTH (Minn...) May 11.—Charles .Towne today made the following statement with reference to his nom-ination for the Vice-Presidency by the

ination for the Vice-Presidency by the Sloux Falls convention:
"It was my judgment that the Sloux Falls convention should appoint a conference committee to meet with a similar committee of Democrats and Sliver Republicans at Kansas City for the purpose of jointly considering the Vice-Presidential nomination. This opinion was freely communicated to prominent members of the convention

before it assembled, and while in session. In the exercise of its discretion, however, it decided differently. When the conclusion was reached to nominate a candidate the unanimity and enthusiasm with which the convention named me is of course exceedingly gratifying. It must be remembered that many of the strongest men in this country were members of the committee, which is composed of the wise and conservative majority of the People's party, whose devotion to the great cause in which all the reform forces are enlisted, nobody can question.

"The indorsement of such a body is a high compliment, and I deeply appreciate it. Moreover, it sets an example of unselfahness at this juncture that ought not to be without good influence. Neither Mr. Bryan nor myself belong to the People's party. To be sure, such a consideration may seem unmportant when men are engaged in a great contest against the same evil tendencies in the government, but mere names are still somewhat powerful in influencing political conduct, and we must render all praise to the convention which thought only of the principles at stake.

"Harmony and cooperation are essential this year among the Democratic, the People's and the Silver Republican parties. To preserve their combined strength of 1896 is the first desideratum. The next is to go into the camp of those who then opposed us and get recruits. If the nominatiens at Sioux Falls are placed before the country with all reform parties behind them they will in my opinion, be ratified by the people of the republic in November.

showing would indicate that between him and "Kid" Mc-d prove one of the biggest args of the season. Consid-weight, this fight was one of

grave doubts. The pace was one that would have told against any man not perfectly prepared.

By the seventeenth round, Jeffries, maddened by the danger of marring his reputation, began a series of desperate rushes, in which he mixed it flercely with Corbett. He seemed an gered by the jabbing at his face, and wanted to end it all with a swing from left or right. Corbett had begun to show the pace, but while his punches lacked force he was still speedy on his feet. He contented himself with avoiding punishment. It became simply a question of how long that sort of desperate game could be kept up.

At the twentieth round, it looked as if Corbett would stay the limit, and popular judgment awarded him a victory. He had up to that time avoided any serious punishment. His face was unmarked, and the scratches on his shoulders and arms were more the result of clinches than blows. His defense was still perfect, and he was smiling quite confidently. He side-stepped from Jeffries's terrible rushes or ducked into clinches. Jeffries was hammering away, however, and was strong and game. The end came with a suddenness of a shock. The men had had two fierce raillies. Corbett was over-anxious to win, and he fitten rounds he was confident of victory. His face showed it, for he hand and toyed with the big fellow at the latter were merely his spargaring partner or punching bag, but his terrific body punching, the adour pugilist's face gradually mad an ashen color, his eyes bled, the corners of his mouth were and an ashen color, his eyes bled, the corners of his mouth were enough what to expect if Jeff and one of his big fists unon the per mark.

Corbett took the hard punishment while a sign of quitting. When the above came he went down in deat with thousands around who symilzed with him, and who will also be seen the corners of the corners of the rest took the hard punishment was provided in the corners of the rest of the men had had two fierce rallies, followed each time by long-range sparring and were in together again. They were both fighting fast and hard Suddenly there was a report of a sharp blow, and Corbett dropped. It needed no count to tell that Corbett's hopes for the championship again were in vain.

The excited spectators sprang to their feet, and for a moment three were roars and calls. The confusion was but momentary, however, and in

was but momentary, however, and in a silence that was most remarkable, the fallen fighter was carried to his corner. Some one called for cheers a silence that was carried to his corner. Some one called for cheers for Jeffries, but the almost sullen crowd refused to give them. Then a moment later, when a friend of Corbett put the question, a thousand rechoed a kindly response. It was in the corner of the defeated man, too, that the crowd gathered, and there were more solicitous offers of aid for him than there were congratulations for the man who had defeated him. It was but natural, however, for Corbett had made a showing that entitled him to that consideration. His skill had made it the best fight that ever had been seen here, and hopes had been with him from the moment the battle shaped itself.

Corbett was out-boxing his man and outpointing him with his lefts to the face. They were both fighting carefully, for while Corbett had the speed and clevenness, he found Jeffries hard to get to, Jeffries fought in his crouching attitude, which proved so hard for Fitzsimmons to solve.

CALIFORNIANS SHOULD WIN.

PRINCETONITES WORKING HARD. PRINCETON (N. J.,) May 11.-The members of the university team, who will compete with the California Uni-versity team next Saturday morning, are bending every energy to win th contest. Both teams have been hard at work every day this week, and all the contestants appear to be in fine condition. It is now the opinion among the undergraduates that aeet will be very closely contested by both teams.

both teams.

Capt. Cregan, when interviewed, said:
"The meet will certainly be very closely contested. We ought to prove better than the California men in the sprints and distance events, but they will have everything in the field events practically thrown in their way. Jarvis, who has been troubled with an injured ankle, is unable to enter more than the 100-yard dash. The chances for winning the meet are against us."

The association will present a handsome banner to the team winning the largest number of points, and the point winners will each receive a medal, Only those winning first place will gain points.

The Busy Store---Fourth and Broadway.

That old sore or ulcer, which has been a source of pain, worry and anxiety to you for or ten years—maybe longer—doesn't heal because you are not using the proper treatt, but are trying to cure it with salves and washes. While these are soothing and relieve to some extent, no real, permanent good can come from their use, because the disease is in the blood and far beyond the reach of external applications.

A sore heals promptly when the blood is in good condition, but never if it is diseased. The tendency of these old sores and ulcers is to grow worse, spreading and eating deeper into the fiesh. They are a constant drain upon the system, gradually but surely ruin the health and sap the very life. A person's capacity for work or pleasure is soon lost in the great desire and search for something to came.

S. S. &t makes a rapid and permanent cure of old sores and ulcers, and is the only medicine that does, because no other can reach deep-seated blood troubles. Ordinary Sarsaparilla and potash mixtures are too weak and watery to overcome a deadly poison that has taken possession of the blood. Do not waste valuable time experimenting with them.

"Some years ago I was shot in the total."

have perfect use of the leg, which was swollen and very stiff for a long time.

S. S. S. is the only purely vegetable blood purifier known; is made of roots and herbs of wonderful purifying properties, which no poisonacan resist. S. S. S. quickly and effectually clears the blood of all morbid, unhealthy humors, and the old, troublesome sore heals. At the same time the general health is invigorated and built up. When a little scratch or hurt fails to heal readily, you may be sure your blood is bad. S. S. S. will soon put it in order and keep it so.

Our Medical Department is in charke of experienced physicians, who have made blood diseases a life study. If you will write them about your case, they will gladly furnish all information or advice wanted, without any charge whatever.

Like it ever seen in this city. We mean the values we are now offering at overstocked prices. The selling of last week was immense, but we doubt not that this week will eclipse it. Call at New York Skirt Company, 341 South Spring street, and we will show you values that you never imagined could possibly be had for the money. Remember, we are the money-back store.

The Angevine Woolen Co.. 238 S. Spring street, which recently opened its doors to the public, is showing some of the newest and most up-to-date spring suits in the city. There was a gathering of the Republican clan of Southwest Los Angeles last night in Paulk's Hall, No. 1224 West Washington street. All classes were represented. Men, women and children crowded the hall to the doors. Once upon a time there was a great showman, P. T. Barnum, who had the happy faculty of attracting the American people to his circus performances. Dr. O. S. Barnum, the genial leader of the Southwest Los Angeles McKinley Club, is not related to the famous magnate of the tented hippodrome, but he can draw the crowds to the shows that he engineers, with like facility. The Southwest Campaign Glee Club of twenty voices, made the popular hit of the evening, with its songs. The tenor soloist and the club chorus sang the following ditty, with taking effect: "An orator talked from the Fast to

STUDIES FOR GIRLS. XIII.-CHARLOTTE CUSHMAN. (1816-1876.)

BY CHARLOTTE BREWSTER JORDAN.

Charlotte Cushman, the greatest of American actresses, was of stern puritan ancestry and born in the city of Boston, 1816. From childhood she showed a grave and earnest character, a disposition to avoid young companions and a fondness for practicing singing and poring over tragedy. Her voice proved of such exquisite quality that she was determined to go on the stage, and at the age of 19 made her début in Boston as a vocalist. This step was strongly opposed by her chrical relatives, who were indignant that the name of their grandfather's greatgrandfather, Robert Cushman, who preached the first sermon in New England, should thenceforth be associated with the stage. Persevering, nevertheless, in her chosen occupation, Charlotte Cushman began singing in different cities.

Owing to the disadvantages her profession imposes, from nature falling to perpetuate in genius, it is difficult for posin the Crescent City she labored gealin the Crescent Ci

ously over the character of Lady Mac-beth until she felt competent to ap-pear in that famous role. Finding her singing voice irretrievably impaired, she began studying the drama with even greater seriousness. While she sometimes showed herself to be a charming comedienne, she felt herself irresistibly drawn to the higher plane of tragic acting, and her instant repu-tation as tragedienne but increased her confidence in her original convic-tions.

also to depart from the traditional family pathway and act with her. They appeared together in Philadelphia, where Charlotte Cushman became manager of one of the theaters until Macready came to this country; then she played with him.

Next to that of Lady Macbeth, her most important impersonation was that of Meg Merriles, the result of a happy inspiration while she was acting as understudy to Mrs. Chippendale. While waiting in the side scene, book in hand, the wonderful dramatic possibilities of the character burst upon her; seising upon the sudden inspiration with her usual concentrated energy of purpose, she flashed upon the stage, a being so weird, so original, so powerful, that she fairly startled her audience into sympathy with her conception, and drew from her manager the following commendation, long cherished by the utility actress: "I have come to thank you." he said, "for the most veritable sensation I have experienced for a long time. I give you my word when I turned and saw you in that first scene I felt a cold chill run all over me."

Rather masculine in appearance, she developed a propensity for appearing in male parts, Hamlet, Romeo, Claude Melnotte and Cardinal Wolsey was considered in many ways a remarkable performance, her Romeo was probably more marvelous in its assumption of a susceptible delicate phase seldom happily portrayed by male actors.

Warm-hearted and high-spirited, her sympathies were actively enlisted during the civil war, when she acted especially for the support of the sanitary commission, to which she contributed over \$8000. In this, as in many other instances, she showed the general trend of her noble life, striving under all circumstances, to quote her own simile. "to keep the prow always turned toward good."

all circumstances, to quote her own simile. "to keep the prow always turned toward good."

After thirty-five years of successful acting, both in this country and in England, where she was accorded an unusually high position as an actress, she determined to devote the remainder of her life to public readings. At the reading desk she confined herself chiefly to Shakespearian interpretations, and found it afforded finer opportunity for her subtile intellectualism. In her acting of Lady Macbeth James Murdoch declares that "she caught the facts of a character, but its conceits were beyond her reach.

She was intensely prosaic, definitely practical, and hence her perfect identity with what may be termed the materialism of Lady Macbeth." William C. Macready, always generous in acknowledging her powers, averred that when playing Macbeth to her Lady Macbeth he felt himself to be "less than of secondary importance—in truth, a mere thing of naught." At the reading desk, however, there was no chance for conflicting opinion. Here there was no opportunity for displaying her marvelous talent of "making up," no scenic setting nor realistic claptrap, nothing but that exquisite elocution, accommodating itself to the varying necessities of the play, balancing every character, and producing upon the fascinated audience the conviction that Shakespeare could have no grander exponent. Solely by the charm of her rich, supple voice, she portrayed the intellectual body of the

LAW-BREAKERS CORNERED. CHINESE MERCHANT BEATS UNCLE SAM OUT OF REVENUE.

While on a tour of collection in Ven-tura county, from which he returned night before last, Deputy Revenue Col-lector John C. Wray discovered a scheme by which the average of the collection scheme by which the government was defrauded of a certain revenue tax, the grounded the plot in Hueneme, where he was informed that a Chinese merchant of the place was sel merchant of the place was selling ex-ceptionally good cigars at much less

in cost.

Investigation brought to light the fact that he had bought them for \$2\$ a hundred from bartenders who have been in the habit of purioining clears from their employers boxes.

At Hueneme he caught a Chinaman in the act of selling cigars from a box containing 100 cigars of eight different varieties, while the internal revenue stamp on the box was dated February 5, 1897, and had never been canceled. Judging from its condition the box evidently had done duty for many months. dently had done duty for many months. The Chinaman was arrested and will

As a result of the kind and loving care bestowed on the walfs by the charitable ladies of the society, the institution has become a veritable home, lacking only that love which the parent alone can give. The training is probably much better than would have been received by the children under more natural auspices. For nearly two hours, the little urchins sat on the hard benches and little chairs without a murmur, and maintained the best of order. At the end of this time young America began to assert itself in restless movements, and the youngsters were dismissed to romp and play in the yard. From outside, clarion shouts and fresh young laughter was wafted back to the room, where the elders were planning for the future. Leapfrog, swings, skip-the-rope and other games lear to the child's heart, held sway for the rest of the afternoon, and school and study were for the time forgotten.

Over all these little lives, Miss Hattie Moss, the superintendent, and two matrons have direct charge. The directors alse devote much of their time to looking after the welfare of the walfs, and there are many friends who call

diphtheria, and one case of typhoid fever. The old wooden building on the grounds that formerly served as a home for the organization is now used as a hospital. There are two detached cottages. One is used for school purposes and the other as a detention hospital for contagious diseases. There is a large staff of consulting physicians, to which Dr. C. E. Kuster was added yesterday. Dr Donald Frick was chosen as the acting physician of the institution for the coming year.

There are always more boys than girls in the home. This is due to several causes. It is easier to find outside homes for the girls and then the Catholic Orphans Asylum on Boyle Heights takes most of the girl orphans of that faith. Boys are not admitted there and many of them drift into the Orphans Home on Yale street.

All the holidays are suitably celebrated. Thanksgiving, New Year's day, and the Fourth of July are bright spots in the lives of the children. In the summer months the tots are given two or three excursions to the Seashore, which are anticipated by them for a long time and enjoyed very much.

or three excursions to the seashore, which are anticipated by them for a long time and enjoyed very much.

The officers of the organization are very anxious to extend the work and to include Sloyd, cobbling, etc., among the industrial pursuits taught. As these things are supported wholly by the generosity of the public, the realization of the hopes of the board will depend on the interest shown in the work by the people of the city, especially the mothers.

The election yesterday resulted in the choice of the same officers for this year as last, with the exception of Mrs. Gail Borden of Albambra, who is a new addition to the directors. The following-named ladies will guide the destinles of the organization for the ensuing year: Mrs. D. G. Stephens, president; Mrs. R. L. Craig, first vice-president; Mrs. William G. on the northern and eastern shores. On the 18th Maj. W. H. Johnston with three companies of the Forty-sixth Infantry, was directed to make a reconnoissance to Lemery, on the Pan-cipal River which connects Lake Taal with the Gulf of Balayan. Maj. connoissance to Lemery, on the Pancipal River which connects Lake Taal
with the Gulf of Balayan. Maj.
Johnston's command met the enemy
at Lemery, 800 strong, with four
cannon and drove them across the
river to Taal. On the 20th he was reinforced by three companies sent from
Bantangas by Col. Anderson, Thirtyeighth Infantry, and attacked and carried Taal, dispersing the insurgents
and capturing their cannon.

Col. Dorst with a battalion of the
Forty-fifth Infantry and a squadron
of the Eleventh Cavairy, was ordered
on the 24th to clear the country
around Lemery and he was engaged
upon that duty when this report was
forwarded. The whole province of
Cavite, so the report states, is being
thoroughly traversed by various
minor expeditions. All of the principal towns have been occupied, in
many of them municipal governments
being established and great numbers
of insurgents have returned to their
homes and gone to work in the fields.
In conclusion, Gen. Wheaton calls
particular attention to the galiant conduct of Lleut. Ward Cheney, who lost
his life in the charge near Imus, on
the 7th; to the "skillful as well as
gallant conduct" of Col. Birkhelmer,
Twenty-eighth Infantry, in the combat at Putol, and "to the prompt and
energetic action" of Col. George R.
Anderson, Thirty-eighth Volunteer Infantry, while under his command. He
also mentions as deserving great
credit to the skillful and gallant services rendered by Maj. E. E. Taggart,
Twenty-eighth Infantry; Maj. W. H.
Johnson, who led the attack on Taal;
Maj. B. D. Price, commanding the
Fourth Infantry, vapt. Charles R.

Filipino Republic Cabinet, who was recently liberated by Gen. Otis, announces that he has become reconciled to American sovereignty and that he will devote his influence to bring about peace. He has sent a proposed peace piatform for the national Filipino party to the insurgent leaders in Manila and to the insurgent generals, including Aguinaido, in the field.

He contends that American control is necessary to prevent civil strife. He recommends to the national Filipino party the adoption of a programme embodying the following features:

"First—Recognition of the sovereignty of the United States, cessation of hostilities and cooperation of the Filipinos in the prosecution of bandits who continue depredations in the name of independence.

"Second—A request for a declaration by the United States government guarnateeing to the Filipinos personal liberties and rights under the Constitution.

erties and rights under the Constitution.

"Third—A Filipino representative delegation to present to the American
Congress and public the desire of the
Filipinos respecting political status.

"Fourth—The application of a part
of the public funds to the unintennance of hospitals for the sick and
wounded Filipino soldiers and for the
establishment of schools.

"Fifth—The transfer of the insurgent
funds to the American treasury.

"Sixth—The establishment of a permanent system of Filipino representatives to the civil commission.

"Seventh—The exclusion of friars
from the administration of the parishes."

## EXPEDITION TO HASHET. ISLANDERS SEEM UNFRIENDLY. [A. P. DAY REPORT.]

MANILA, May 11.—[By Manila Ca-ble.] The islanders of Hashet re-ceived Col. Harding's expedition dif-ferently from those of Marinduque ferently from those of Marinduque when he left a regiment. On approaching the principal town, Balano, the insurgent trenches appeared to be occupied, and the gunboat Helena bombarded them vigorously, after which three companies were landed and captured the trenches with little resistance. One Filipino was killed. Twenty-three hundred insurgents hold the neighboring towns and the natives appear unfriendly.

Mrs. Van Gorder's Interesting Suit Before the Court.

Judge Pitzgefald Sustains Defendant's

Clara M. Van Gorder and her newly-married husband against the City Board of Education for reinstatement as a teacher in the city schools, though as a teacher in the city schools, though married, and for the payment of her salary for time lost since she was wedded and discharged, came before Judge Fitzgerald yesterday. After an abundance of discussion and suggesabundance of discussion and suggestion, the board's demurrer was sustained and the Van Gorder forces were given twenty days or more to amend their complaint and make a new start.

Mrs. Van Gorder's attorney is Russ Avery, Esq., against whom is pitted City Attorney Haas, who is guarding with a double-edged sword the stand taken by the Board of Education.

After the complaint was read, wherein it was stated that Mrs. Van Gorder was discharged from her position as principal of the kindergarten at the Seventh-street school on February 21, after her marriage, and had been unable to draw her pay, although she is under contract with the board to render services as a teacher, City Attorney Haas presented his demurrer to the pleadings. The point on which the demurrer was sustained was to the effect that from the complaint it could not be ascertained whether, Mrs. Van Gorder heid her position by election or was employed by contractial appointment.

Before the court gave his ruling, however, Mr. Haas began discussing 'the Supreme Court opinion touching similar cases, to show that they had no applicability to the case at bar, in that Los Angeles does not issue what is known as "city certificates," as do San Francisco and other large California cities, and in that the complaint failed to aliege any contract.

At this point the court interrupted to remark that it seemed to him that the complaint was defective, since, it did not show for what term Mrs. Van Gorder was elected, if elected; or for what length of time appointed, if appointed, and then asked Attorney Avery what he had to say on the issue.

Mr. Avery maintained that the was unnecessary to set forth the contract. Had he set forth a contract, he said, as was also suggested by the City Attorney, mandamus would not have been his remedy in court, but rather breach of contract.

Judge Fitzgerald suggested, however, that the complaint should be amended. tion, the board's demurrer was sus-tained and the Van Gorder forces were

It was then Mrs. Martin's turn at taking the initiative, and she in due time filed a suit against Coney for damages as reimbursement for a shattered reputation because of the perjury charges. This is the case-which Judge Allen now decides against her. In giving his decision yestersay, Judge Allen was especially harsh on neighborhood rows. "They are unfortunate," said he, "and prove a disgrace to all parties involved." He thought the District Attorney had done right in dismissing the criminal charge against Mrs. Martin, holding that, while there may have been technical perjury at the trial of the girls, it was not willful. The woman, exasperated by the annoyances of the children, worked herself into such a frame of mind that she really thought she was telling the truth when she was not.

ECHO OF THE PAST.

Judge York overruled a demur yesterday in the case of the Chicago Live Stock Commission Company against W. B. Storts, wherein judgment for \$12,105.25 is asked. Storts is the man from Missouri who was arrested a little over a year ago by the Los

ment.

A motion is now before the court that judgment be entered for the Live Stock Company, as prayed for, on the ground that Storts has long ago instructed his attorney, E. A. Meserve, Esq., to abandon all defense in the action. An order is also asked for, requiring Meserve to turn over to Mesers. Mulford & Pollard, attorneys for the plaintiff, the sum of 192.80, aileged to be withheld, on the ground that Meserve received the \$92.80 from J. M. Glass, late Chief of Police, as property belonging to Storts, who is alleged to have instructed his attorney to pay over the moneys to Mulford & Pollard and obtain all the orders of court necessary for carrying out such instructions—all of which, it is alleged, Meserve has neglected to do. On December 7, 1895, the pariles to the action, by their attorneys, got together for the purpose of carrying out Storts's instructions to convey to its owners all property then in the hands of the Chief of Police that had been attached by three suits begun in the Superior Court of Los Angeles county to recover the amount alleged to have been embezzled.

Pursuant to these instructions, Glass and Meserve turned over to Mulford & Pollard an order on the First National Bank of New York for \$750.1, a certificate of deposit issued upon the Bank of New York for \$750.10, and \$100.0 in currency.

But, according to an affidavit of Pollard recently filed, Glass and Meserve refused to turn over \$2.80, alleged to be a portion of the property attached and to have been taken from the person of W. B. Storts at the time of his arrest.

Meserve answered Pollard with a counter affidavit, that was filed yester-

DEMURRER OVERRULED. Judge Trask rendered an opinion yes-terday overruling a demurrer in the damage suit of Frank E. Simons of North Passadena against Constable Holloway; his surety, the Fidelity and Deposit Company of Maryland, and S. L. Wallis, a deputy, for \$2000 for per-sonal injuries. Wallis put Simons out

be considered and it is given as fairly and consecutively as the memory of the people living in the district would permit.

In 1889 Nathan Cole, Jr., bought of Bent & Rowan sections 12, 13 and part of 14, in township 5, range 11 west. About one year later Mr. Cole sold a Gue-third interest to H. G. Billings, and these gentlemen formed the Alpine Springs Land and Water Company, each holding an interest in proportion to his lands. In 1882 the Little Rock Creek Irrigation District was formed as of all the water rights of Little Rock Creek Prings Company selling all its title to the district for 586,690 worth of bonds. In 1899 Nathan Cole, Jr., upon acquiring the rights of Bent & Rowan, began injunction proceedings against the Palmdale Irrigation Company to quiet title to the waters of Little Rock Creek. This case was not tried till 1893. Cole and his successors held riparian iand upon the creek. Riparian land upon the creek. Riparian land upon the creek. For the first four years after the planting of trees began, or till 1897, there was plenty of water. Until about the first of July the flow held up to 200 to 300 inches, gradually running down later in the season. General complaint was heard in the neighborhood that the Alpine Land and Water Company, after having sold to the district all water rights, had permitted their authorized agents, Palmer & Chapin, to sell the lands within the district at exorbitant prices, when the lands without the water would not have been worth \$10 an acre. The property owners had bonded their lands for \$40 an acre, and investors were charged between two and three hundred dollars an acre for land that was practically worthless before the bonds were voted to secure the water. This, they claim, was making the settlers pay three or four times for the right to work out their own salvation growing almonds under an inadequate water supply, and thus affording an excessive profit to the Alpine Springs Company, as owners of the land, and another rake-off to Palmer & Chapin, as agents for the land—all of which was paid by the investors to the engineers of the scheme without proper equivalent.

He the statements of the investors are

THAT COMPROMISE. THAT COMPROMISE.

If the statements of the investors are true, the Little Rock Creek Irrigation district has received only half the water rights contracted for, but as they were parties to the compromise with the Palmdale company they have no cause of complaint on that score. As an offset to this, however, the people claim that the affairs of the district were dominated by Palmer & Chapin, and the Alpine Land and Water Company, leaving the few settlers upon the

The photographs were taken from actual scenes, but some of the pro-posed palatial residences, as pictured actual scenes, but some of the proposed palatial residences, as pictured were extravegant, misleading and calculated to deceive. The circulars according to the statements of several of the investors and as noticed from perusal, contained the most monumental exaggeration of facts and probable profits in fruit cuiture. One disinterested party charged Palmer & Chapin with downright fraud in the publication, and results of this literature, and cited the softsequent sale of section 13 as evidence of premeditated fraud. A portion of the south half of section 13 lies below the main ditch, but a large portion is above the ditch and has no water right whatever to use district water, as it is completely outside the district. About 1897, Palmer filed on a spring about a mile south of section 13, and did some work developing the spring and laid a pipe line to the southwest corner of the section. This spring flowed about one hundred barrels a day of twenty-four hours, when it got thoroughly into action. Palmer received several hundred dollars from parties whose lands were above the ditch for "water rights" from this spring, land that was sold above the ditch brought about the same price to Palmer & Chapin, as land below. They, in some instances, took money from purchasers of this dry land for water rights from the district. The year of their appointment, Palmer & Chapin bought 980 acres, on contract, from the Alpine Springs Company, in sections 12 and 13. In 1893, the purchasers sold this land to various eastern partiés at various prices. This land was sold on three years' time, the Alpine Springs Company, contracting to plant and care for the trees for three years. The work was well done. In 1894, Palmer & Chapin bought from the Alpine Springs Company contracting to plant and care for the trees for three years. The work was well done. than pay the costs of the orchards."

The interests that Nathan Cole, Jr., had in the transactions of Palmer & Chapin cannot be traced by the people of the colony, who furnished all the above statements, as Cole wrote few letters to eastern parties, Palmer doing all this work.

SOME ABANDONED ORCHARDS Of nearly 600 acres planted to al-monds in section 6, all but one or two small orchards have been abandoned. monds in section 6, all but one or two small orchards have been abandoned, the trees at this writing being in a dying condition. The maps delineating section 6 and the townsite show a proposed railway to connect with the Santa Fé, another running to Salt Lake City, and an irrigating ditch leading or misleading from Little Rock Creek arroyo, far below the present irrigated section. The people who purchased lands charge many other unsatisfactory transactions to Palmer & Chapin. A purchaser claims that he overpaid the firm nearly \$300, and asked for the return of the money. His answer was an offer of four town lots, instead of the money.

In November, 1897, H. G. Billings, who had been secretary and treasurer of the Alpine Springs Land and Water Company, died. In the fall of 1898 the firm the early part of 1899 Cole and Palmer bought the interests of Mrs. Billings in the Alpine Company, and took over the business of Palmer & Capin. Since that time the company appears to have had its principal office in Chicago, though the circulars represent one office located in the Henne building at Los Angeles. The circulars of 1899 state that Palmer & Cole are the sole proprietors of the Alpine Company.

DREAMS OF A DREAMER.

proprietors of the Alpine Company.

DREAMS OF A DREAMER.

A booklet was published under the new firm name in 1829, containing 110 pages, and offering the land at the same prices, although the experience of the five preceding years had demonstrated that the water was not sufficient to irrigate the lands already sold. This booklet is pronounced by many of the investors to be absurd, and visionary. It assures investors in almond orchards of an annual profit on the investment of 205 per cent. per annum, or an average net annual yield per acre for sixteen years of \$570.16 cents, and nonresidents who leave everything to the company care takers of the orchard a net income of 155 per cent. per annum, almonds selling at 10 cents a pound. The pamphlet sets forth that "one man can perform all the labor on a forty to sixty-acre almond ranch," and by the figures given clean up a little matter of \$350,000 net in sixteem years' work, with only his own hands. Almonds at 10 cents a pound will do all this, and at 15 cents, which is sometimes received, the imagination is left to revel in possibilities. Twenty-two devoted to the elaboration of the "Insurance Annuity Plan," the "safest and most remunerative proposition ever devised. Cash or time payments, no in-

Little Rock land manipulators with the South Antelope Valley Irrigation Company. That organization is approved of by the citizens of Little Rock and Palmdale, and it has expended hundreds of thousands of dollars of its own money in the construction of mammort reservoirs, flumes, tunnels and pipe lines. The few dry years have prevented the company from filling the reservoirs or getting water upon the lands around Palmdale. They have sold but little land and are not trying to sell. This irrigation company has no connection whatever with the Little Rock schemes; and while it has no water at present, it has never failed to appear on pay day.

## FERTILE LANDS

SOME SPLENDID ORCHARDS. The lands of the so-called Tierra Sonita Colonies, lying within the Little Rock district, slope gently from the mountains toward the desert. This mesa soil is of decomposed granite, and is exceedingly fertile. It is of great depth, is unincumbered with and is exceedingly tertile. It is of great depth, is unincumbered with boulders or stones of any kind and produces remarkable tree growth and alfalfa, when properly irrigated. There are few soils more friable in Southern California, nor lands in the State that have better climatic conditions for almonds and apples, were it not for occasional froats that may destroy the former. At present, the orchards in this district, where thoroughly irrigated, show remarkable thrift and entire freedom from insect pests, fungoids and diseases of every character, and with the exception of the red spider, the territory seems entirely free from insect or cellular infection. A few of the pear trees show indications of blight, but there is a fine crop on many of the Bartlett trees. About two thousand acres are planted to trees, mostly of almonds, but largely of prunes. There are a few apricots, pears, apples, figs and cherries. Prunes are an entire failure and the culture of this fruit will probably be abandoned entirely.

While there are some of the thriftiest trees in the State on these lands, where sufficiently watered, many of them show a sad lack of moisture. In the production of almonds, the lands of Little Rock are unsurpassed, and apples are grown of superior quality. Around the door yards and in the orchards near the main ditch line, there are almond trees 5 or 6 years old that have grown to unusual proportions, and many of them are almost breaking down with nuts. The almonds are found in the foothilis, growing there in the State was settled, and this fact leads to the claim that the Antelope Valley is the home of this nut.

Alfalfa grows more luxuriantly than usual, and cures in the warm, dry air coulders or stones of any kind and

Alfalfa grows more luxuriantly than usual, and cures in the warm, dry air without losing its color. As to the production of other fruits, than apples and almonds, it is problematical, but whatever kinds will thrive here, will excel in quality the fruits grown in a damper climate.

AN UNTRUE REPORT. The published statements that the lands of the Little Rock district are lands of the Little Rock district are very poor, and composed of drifting sand, is untrue. On the contrary, they are all that is claimed for them in fertility. It is true that the district is subject to strong winds, and that they may of some seasons interfere with tree growth. But, as a whole, the winds are not excessive, for the tree

stand perfectly erect and firm throughout the entire colony, even where their vigor has been impaired through lack of water. It is not true that the natural conditions are adverse to profitable fruit growing, except in the way of drought and cold, from which very few districts are exempt in any portion of the State. Neither is the statement true that experience has shown that it is too cold to grow almonds at Tierra Bonita, for almonds were raised last har to the capacity of the water supply, and this year all the orchards which were properly irrigated and cultivated have a fine crop. The water right is fair of ordinary years, and will cover successfully a large portion of the territory already planted. There is room for vast improvement in the conservation and application of the water supplies, which the funds of the district do not seem able to meet. Assuming that the colony is to go on and work out its destiny under the "Wright act," all efforts to spread the water already at hand over lands not now owned by actual orchard investors are reprehensible, in view of the fact that these people have been led into investments by what they claim to have been extravagant representations about almost everything but the soil and climate.

SUMMED UP.

SUMMED UP. In summing up this matter from the evidence, it appears that certain schemes have been visionary, and their projectors have been unable to work out details that might make some of their plans successful; that the advertising literature sent out by Palmer & Cole contained extravagant claims; that many investors, secured through roseate representations, are dissatisfied, and that the promoters are still engaged in the attempt to make further land sales at Tierra Bonita.

On the other hand, there is merit in the lands of the colony; the planting of orchards by the Alpine Company and its agents, has been fairly done in the main, but in some cases impracticable methods 'were adopted to produce orchards and certain demands have been made upon investors for supplemental work that was not expected.

It is hoped that enough light has ing up this matter from the

vestors for supplemental work that was not expected.

It is hoped that enough light has been thrown upon the question under investigation to give the public a fair idea of the administration of the affairs of the Alpine Springs Land and Water Company, and the Little Rock Creek Irrigation District, and of conditions prevailing in their domain. Should the public weal demand further slucidation, additional information may elucidation, additional information may

Nothing but disapproval of the continuance of these extravagant vaporings is heard from the people of Antelope Valley, even those connected with the interests of these lands—seller ridiculing the visionary statements contained in the circulars issued last year.

ANOTHER COMPANY.

The public should not compare the Little Rock land manipulators with the South Antelope Valley Irrigation Company. That organization is approved of by the citizens of Little Rock and Palmdale, and it has expended hundreds of thousands of dolars of its own money in the construction of mammoth reservoirs, flumes, tunnels and pipe lines. STARVING FAMILY RELIEVED.

The attention of Chief of Police Elton was on Thursday evening called to the fact that a Mrs. Nelligan and four children, living at No. 802 Temple street, were in a starving condition. Mrs. Nelligan's husband, a painter, deserted her some months ago, leaving her to shift for herself and three-children. The fourth child was born only a few days ago, and the mother and children were absolutely on the point of starvation. Chief Elton Immediately sent some groceries to the house, and yesterday the Associated Charities provided a nurse for the sick woman and will look after the family until Mrs. Nelligan is again able to earn a living for herself and little ones. The police are looking for the man who so basely deserted his family.

Wednesday evening the California Mutual, boring on the southwest corner of the west one-half of the northeast one-quarter of 28, 28, 28, struck oil, which was accompanied by a big flow of gas. The works were shut down, it being too dangerous to have lights about the well on account of the quantity of gas. This well moves the edge of the district in that neighborhood, half a mile north. There is already a number of wells in 28, but they are all near the southern boundary of the section. The stratum seems to have taken an upward tilt, as the depth at which the sand was reached is £28 feet. As it was not expected at so shallow a depth, no casing had been put in.

"Will Try Again" Read it carefully; ponder the facts.

"Will Try Again" is a popular newspaper heading these days, referring to oil companies which have failed in their hunt for oil. It is strange, but nevertheless true, that some people really believe that there is such a thing as certainty in the hunt for oil. They are beginning to have forced on them the truth which reliable newspapers have been trying to teach them, that the majority of the companies must fail, and that there can be nothing sure but the oil itself. Oil is a good thing, but under the most favorable circumstances the hunt for it is a speculation, with the chances against any given venture.

A company fails to get oil in its first well and says that it

POINTS ON WHEAT. President A.

J. Earling of the Chicago, Milwaukee and St. Paul Railroad, says: "From the number of reports I have received I judge that the seeding of wheat is virtually completed, and of oats and barley from 60 to 75 per cent. There is little if any corn planted, although the soil is in fine condition. The winter wheat conditions are very favorable.

The Liverpool Corn Trade News estimates the consumption of wheat in the United Kingdom for the first thirty-five weeks of this season at 162,400,000 bushels, or 4,540,000 weekly. Of this total about 122,600,000 is foreign and 40,-600,000 native wheat. The period mentioned includes four months of the season when the demand is supposed to be at a minimum.

Minneapolis advices are that the spring-wheat acreage in Minnesota and the Dakotas ranges from the same as last year to 25 per cent. decrease, while the flaxseed area is increased from 10 to 50 per cent. Other advices say that the asgregate seeded in the Northwest to all grains, including flax-seed, will be 15 to 20 per cent. more than last year.

The Chicago Daily Trade Bulletin estimates that from reports thus far to hand the prospective yield of winter wheat will be about 370,000,000 bushels, or 74,000,000 bushels more than n 1899.

President Davis of the Winter Wheat Millers' Association says there is not enough soft winter wheat in Ohio. Michigan and Indiana to keep local mills going, and that Hessian flies are so bad in great sections of those States that farmers will plow up a great deal of wheat area and sow to other crops. The Mark Lane Express, in its weekly review of the crop situation, says the winseasonable return of winter last week destroys the last chance of the wheat and spring-sown corn in England and France being reaped at the average date, while it materially diminishes the prospect of the crops attaining the average yield.

SCHOOL CENSUS. POMONA, May 11.—[Regular Corre-pondence.] Walter A. Lewis, census numerator for the Pomona school disrict, finished his duties for this year, last night. The total number of white children between the ages of 5 and 17 is 1487, 759 boys and 728 girls; there are also 6 negro boys and 22 girls, there are also 6 negro boys and 2 girls, making the total 1495. This is a marked in-crease over last year's census, which showed 1298, and in 1898 the number was 1256. From the most conservative computation this shows the present population of Pomona to be about 7000. POMONA BREVITIES.

This community was surprised last night with heavy showers, and this night with heavy showers, and this morning the Nichols gauge registered .76 of an inch. This, added to the amount of rainfail here four days ago, makes 2.59 inches, and over 11.75 inches thus far for the season.

SANTA ANA, May 11 .- [Regular Con respondence.] Francisco Castillo, the young man from Whittier who has been invoking the law in his behalf to procure a bride from the classic shades of Bolsa, in the person of pretty Lena Landis, today came out victori-ous, and as the sun was at meridian height he proudly led the ideal of his heart into the presence of Justice of the Peace Willson, who performed the ceremony that made them one. Miss Landis was brought in from the country yesterday by an officer, her father having declared that she should not marry the young man from Whittier, and threatened to perforate the hide of any lover or officer who attempted to take his daughter away from him. But it was claimed that Lena was of age, and consequently a writ of habeas corpus was issued citing the parents to bring the girl into court that her age might be determined. But the parents did not appear in court, and the court dismissed the case. The girl and her lover took advantage of this slip, and hurrying to the office of Justice of the Peace Willson were married without delay.

INTERESTING WATER LAWSUIT.
SAN BERNARDINO, May 11.—[Ref-INTERESTING WATER LAWSUIT.

SAN BERNARDINO. May II.-Regular Correspondence.] A case of particular interest to the hundreds of users of artesian water in San Bernardino is on trial before Judge Campbell, in Department Two of the Superior Court. Leah Katz is the plaintiff and Margaret D. Walkenshaw the defendant. The contest originated in the action of the Riverside Water Company last summer, in leasing from Mrs. Walkenshaw the flow of certain artesian wells that had been sunk years ago, but had been capped, as there was no call for the water. Following the uncapping of these wells, the artesian system of the city feit the effect, and within a few days many wells in the city had ceased to flow, and the owners were forced to connect with the mains of the city water system. The plaintiff is being backed in the prosecution of the caseby a number of water users, who allege that their supply was lost as a result of the uncapping of Mrs. Walkenshaw's wells. Water experts are being called upon to tell all they know about how the rainfall on the mountains percolates down to the sea and how the water disports itself en route. The plaintiff is represented by H. C. Roife, Esq., and C. C. Haskell, Esq. Byron Waters, Esq., is looking after the interests of the defendant.

CLUBS OF WOMEN.

FRIDAY MORNING CLUB "Housekeeping as a Business," handled in a paper by Miss Jennie E. Collier, was a subject that drew a large audience to the Friday Morning Club yesterday. Miss Collier deprecated the social custom by which a large numsocial custom by which a large num-ber of women marry without knowing anything of housekeeping. She argued that a knowledge of the works of a house should be regarded as just as essential to a girl about to marry as is her trousseau, and was of the opinion that, under modern skilled teachers, it

could be taught girls in very nearly as short a time as that occupie preparing an elaborate trousseau.

as short a time as that occupied in preparing an elaborate trousseau. All women should have some useful occupation. Those who do not intend to ingage in any other, whose husband's staining its small, might contribute their part to the household economy by undertaking their own housework and setting about the preparation for it by thorough study of the best methods. In any case, knowledge of work needed to be done gives a wife an advantage in the hire and direction of servants that can be obtained in no other way. In all other trades and professions an apprenticeship is considered necessary; why not in this?

Miss Collier combatted the idea, however, that housekeeping is the only occupation creditable to the woman. Social usage would endeavor to keep up this idea, but the condition is now-adays an artificial one. Some useful employment every woman should have, but modern appliances and manufactures are making it less and less necessary that it should always be that of housekeeping. Health foods and all manner of special and increasingly excellent food products are now being manufactured outside the home. To cling to the home product when the factory article becomes better, will be as foolish, in this case, as in the case of cloth weaving and stocking knitting. Many a society woman spends as much time outside her home in mere recreation as could be profitably given to some vocation. Girls brought up with the idea that they cannot creditably undertake work outside the home, are compelled to turn to all manner of devices to keep themselves occupied; to devote much time and thought to new combinations of ribbons and lights for afternoon tean, or throw themselves with dispropritionate enthusiasm into the construction of a large quantity of shirt waists hardly

thought to new combinations of ribbons and lights for afternoon teas, or throw themselves with dispropritionate enthusiasm into the construction of a large quantity of shirt waists hardly as successful as those to be bought in the store, and certainly not more economical. "When every able-bedied adult member" of a family spends a few hours every day earning his or her daily bread," said the speaker, no one member will be so overtaxed that that home will be only a place to eat and slep in; and the family reunions at the close of the day will be indeed a social occasion and not a gathering of wearied business men and perplexed society women.

"The modern servant question can be solved in America only by the demand for women trained in schools of housekeeping. Modern taste requires better service than can be obtained in any other way, But successful training demands intelligence, and with intelligence will necessarily come culture. To the trained servant of the future we shall probably have to yield the front door and other privileges, as we yield them to the trained nurse."

Mrs. Robert J. Burdette, who arrived just at the close of Miss Collier's paper, pleaded inability to take part in the discussion of issues raised, as she had not heard these put before the

club, but declared that the great need of the world today is capable women, and begged her hearers to see to it, wherever they were able, that women should start out in life equipped to care for themselves in some manner. She stated that her chief mission to the club was in the interest of reorganization of the federation of clubs, as the number meeting had now grown unmanageably large, five thousand delegates being expected at Milwaukee. It was therefore proposed that delegates should hereafter be qualified only from federations of clubs, not from each club so desiring; federation meetings and discussions to be open to all club delegates and members, but motions and votes limited to delegates from federations only.

The matter of appointing delegates to the Milwaukee meeting was submitted to the club and referred to the board.

The exact cause of the accident which resulted in the death early yesterday morning of Mrs. Lizzie Wozencraft by an electric shock, near the corner of rith and san Fedro streets, in this city, may never be known, but it is a fact that the condition of the electric wires just at that corner is a menace to all passers-by. The current which supplies the street lamps at that point is of the enormous strength of more than 7000 volts. At the corner of Pifth and San Pedro streets stands a tall mast, on which there are three lamps. A guy extends from that mast to a small pole near the corner and touching that guy is another leading from an ordinary pole to another guy pole. At the time of the accident these guy wires were touching each other and the current from one could pass into the other. That these wires were heavily charged with electricity is proven by the fact

that one of them touched a pole and that pole—the one which caused the death of the unfortunate woman—was burning near the top at the time of the accident.

Yesterday morning, when the fact of the accident.

Yesterday morning, when the fact of the fatal accident became known, one of the electric companies sent a force of men to that corner to repair the damage. They cut several wires, removed others, scraped off the charred portions of the partially burned pole and carefully painted it anew.

At the conference between the representatives of the lighting companies and members of the City Council yesterday afternoon, the statement was positively made that the use of current of that voltage on lines so near to other lines is a menace to human life throughout the city. At Fifth and San Pedro streets there is a network of wires. The guy wires touch each other and communicate to the poles without any insulation whatever and on a rainy day or night, any person who touches such a pole is in danger.

An Excellent Combination The pleasant method and bene ficial effects of the well known remedy, SYRUP or Figs. manufactured by the California Fig Syrup Co., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. taste and acceptable to the system. It is the one-perfect strengthening laxative. cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowela, without weakening or irritating themmake it the ideal laxative.

In the process of manufacturing

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtain-ed from senna and other aromatic plants, by a method known to the CALIFORNIA Fig Syrup Co, only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the company printed on the front of every package.

Inquest was held yesterday afteron the body of Mrs. Lizzie Wozft, who was killed by an electric,
the current coming down in a trolley pole which had becharged. Representatives of 
treet railway and the various 
to companies denied responsibility was alleged that there was no 
wire hanging down on the pole, 
as stated by those who, were at 
cene shortly after the woman's. 
The jury returned a verdict to 
flect that death was accidental,
